

Artique Collections Plantation Grown Solid Mahogany Furniture

All Hand Made

Authorized Dealers Only

Terms and Conditions

We design and manufacture furniture made from **solid wood**, with style and value in mind. The wood species we use are primarily Mahogany and Teak. We source from our partner wood working shops in Indonesia and work with vendors on the improvement of construction methods and refinement of design.

Our unique pieces may include plantation grown and/or recycled timbers and are hand constructed by craftsmen using traditional joinery techniques.

Solid wood furniture by nature, is affected by humidity and atmospheric pressure. REAL wood continually responds to its environment (chipboard, plastic and plywood do NOT). Some splitting, cracking and warping may occur. Additionally, recycled materials are assembled in their natural state and may exhibit variations in size and coloration.

This is the inherent NATURE of solid wood.

We cannot warrant against naturally occurring responses to environmental characteristics.

All of these factors are NON-structural and are a part of achieving the authentic Nature and emotional appeal of genuine solid wood furniture!
